

Supporting early childhood sustainability

Looking to engage children at your service in environmental sustainability? Maitland City Council offers free EYLF-aligned incursions to connect students with their environment and build understanding across a range of topics.

Presentations

Each presentation is approximately 30 minutes and can be repeated across sessions for multiple groups.

Your Three Bin System

Children will learn about what can go in each of the kerbside bins and participate in a mini-waste audit using everyday waste materials.

Available from February to April 2026

Composting and Worm Farming

This workshop provides staff and children with information on setting up a worm farm or compost bin, what materials can be placed in them, and ways we can reduce food waste.

Available from May to June 2026

Our Biodiversity

This workshop will provide children with the opportunity to explore what makes up our local environment and the different creatures that live in our region.

Available from July to September 2026

Water Pollution

Children will learn where our water comes from and participate in a hands-on demonstration of what can happen to our local waterways if pollutants are allowed into them.

Available from October to December 2026.

Keep up to date with events, grants and news with our Green Communities Newsletter.
